Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by McCarthy (US 5,838,451), cited by applicant.

McCarthy discloses a color measurement instrument comprising: illuminator means (120-122) for illuminating a sample (123); color measurement means (125) for measuring light reflected from said sample (123); temperature changing means (lines 56-63 of column 2) for changing the temperature of said illuminator means (120-122); temperature sensing means (126) for sensing the temperature of said illuminator means (120-122); and control means (lines 49-51 of column 5) responsive to said temperature

Art Unit: 2877

sensing means (126) for controlling said temperature changing means (lines 56-63 of column 2) to control the temperature of said illuminator means (120-122). The illuminator means includes a light emitting diode (lines 28 and 29 of column 5). The illuminator means includes an illuminator and a thermally conductive base supporting the illuminator (lines 49-51 of column 4, lines 19-23 of column 9, and lines 4-5 of claim 1). Applicant's attention is directed to McCarthy in its entirety with particular attention directed to Fig. 10 and the text pertaining thereto.
